ISA: Configure a PPTP VPN Client Connection in Windows®7

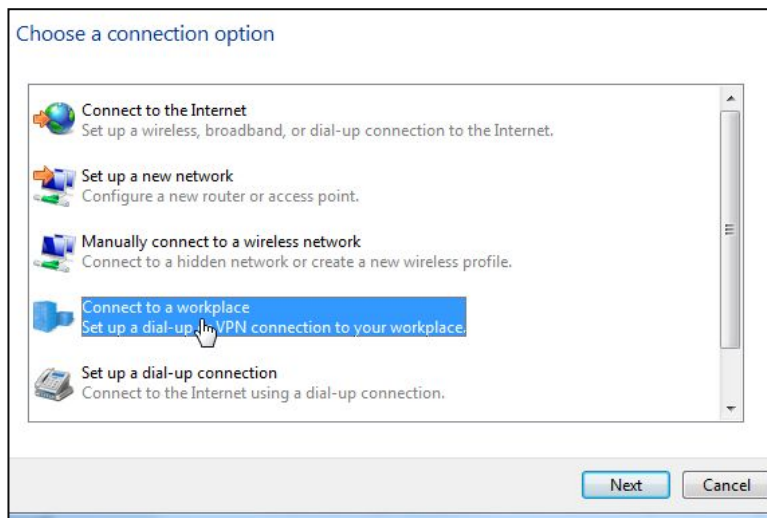

Skill level: Intermediate

Requires: Familiarity with Windows®7

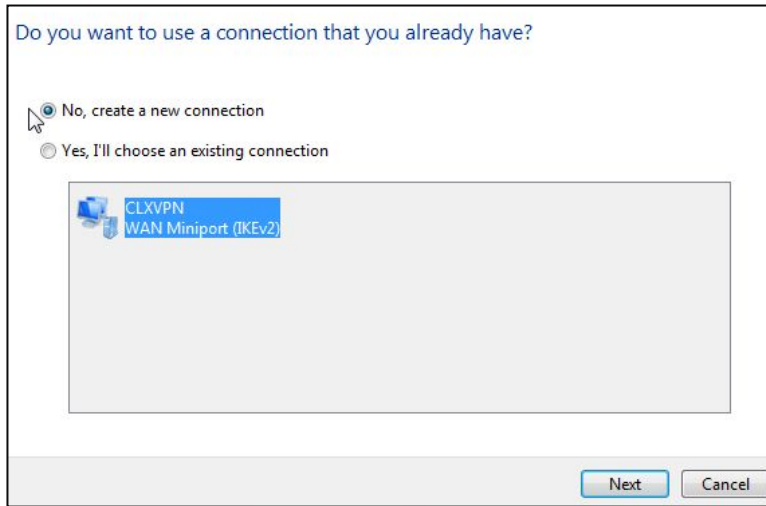

This document will provide instructions on how to create end user client access to your ISA-protected network using a PPTP connection. The instructions cover Windows7 remote computers.

To create a PPTP client connection:

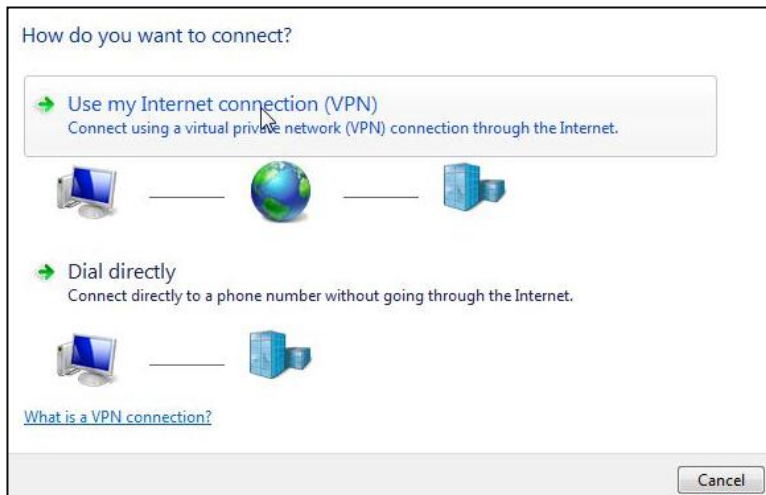

1. Open the Start menu on the client computer and navigate to **Control Panel/Network and Sharing Center/Set up a new connection or network**.
2. Select Connect to a workplace and click **Next**.

3. Select No, create a new connection and click **Next**.

4. Select Use my Internet connection (VPN).

5. Enter your VPN information in the **Internet address** field and give the connection a descriptive name in **Destination name**. Click **Next**.

Type the Internet address to connect to

Your network administrator can give you this address.

Internet address:

Destination name:

Use a smart card

Allow other people to use this connection
This option allows anyone with access to this computer to use this connection.

Don't connect now; just set it up so I can connect later

6. Enter a User Name and Password.
Note: **Domain** is optional.
7. Click **Connect** to test the connection.

You have completed the steps for configure the Network Connector on Celestix WSA appliances.
